

CONDITIONS OF WARRANTY

The consumer has the rights foreseen by paragraph 1519-septies of Lgs. Decree 24/2002 (Italian Legislative Decree n. 24 of 2nd February 2002 "Implementation of Directive 1999/44/EC on certain aspects of the sale of consumer goods and associated guarantees" published in the Gazzetta Ufficiale n. 57 of 8th March 2002 - Ordinary Supplement n. 40), which rights remain unprejudiced by the guarantee provisions indicated here following. The guarantee is offered by Quick® S.p.A. Via Piangipane 120/A 48124 Piangipane (RA) Italy. All rights of guarantee are strictly dependant on presentation to the company Quick® S.p.A. of the following documents:

- A document proving purchase of the product and purchase date. (Invoice bearing the description of the item);
- The batch number (printed on the label fixed to the item and in the user's manual).

The holder of the warranty right is the buyer or the user of the product. All articles sold by Quick® S.p.A. are guaranteed for a minimum period of 2 (two) years from the date of purchase of the product at zero duty (work) hours. The warranty covers all manufacturing faults.

The product is not covered by the warranty in the following cases:

- Incorrect or improper installation;
- Products damaged by negligence;
- Products damaged by incorrect connection;
- Damages and breakage that may have occurred during transport;
- Warranty requests of Quick® S.p.A. for presumed defects or problems caused by incorrect installation;
- Maintenance carried out by personnel not authorized by Quick® S.p.A.;
- Use of non original spare parts;
- Damage resulting from uses other than those prescribed by Quick® S.p.A.;
- Removal or cancellation of the serial number;
- Dismantling or removal of the components of the item.

The guarantee does not specify complete replacement of the item. The warranty only covers the replacement of the parts needed for the product's return to working order and relative labour.

Replacement or repair is solely at the discretion of Quick® S.p.A. Quick® S.p.A. is not responsible for direct, consequential, incidental or special damages deriving from any defect covered by the guarantee or otherwise, this including lost profits, lost service, and any damage to or replacement of capital goods or property.

The guarantee does not include packing and transport costs, or any travel expenses that might result from any intervention requested at the customer's site. The buyer is responsible for all costs resulting from the removal and re-installation of the product.

In addition, the customer is not entitled to claim any refund for additional expenses or for the immobilization of the boat. Intervention under the guarantee does not result in entitlement to extension/renewal of the guarantee period. Defective parts replaced under guarantee remain the property of Quick® S.p.A.

The guarantee is recognised in any country where the product is sold, inside and outside the European Union, according to the specific legal regulations in force.

The above replaces any other verbal or written information communicated to the purchaser.

No person or persons are authorized to communicate information, on behalf of Quick® S.p.A., that differs from the present statement.

Installation instructions and symbols:

- 1) Please read carefully each symbol on the product label, check the meanings listed below, and respect the listed limitations
- 2) Always disconnect the power source before installing or repairing any lighting device
- 3) Check the label for the maximum voltage(V) and wattage(W) limits before supplying power to the product
- 4) Follow carefully all current installation and maintenance regulations
- 5) Quick Marine Lighting is not responsible for the misuse or negligence of any lighting device. It also required that installation will be completed by qualified personnel, in compliance with safety instructions as presented herewith.

Short description of symbols (CEI EN 60598-1)

CE Compulsory mark of conformity with European instructions to be indicated on electrical products with a voltage between 50Vac and 1000Vac (in alternating current)

IP the "resistance" offered by the device to solid or liquid penetration is indicated by the prefix IP (International Protection) followed by two significant numbers, the first one indicating the grade of protection against penetration of solid bodies and the second one against penetration of liquids

IP20: (2) protection against penetration of solid bodies of dimensions larger than 12 mm and (0) no protection against penetration of liquids.

IP40: (4) protection against penetration of solid bodies of dimensions larger than 1mm and (0) no protection against penetration of liquids.

IP55: (5) protection against dust and (5) protection against water jets from any direction.

IP65: (6) total protection against dust and (5) protection against water jets from any direction.

N.B.: the protection only regards external parts, not embedded and correctly installed on the ceiling.

Indicates that the device is suitable for installation on "normally inflammable" surfaces.

Indicates that the device is suitable for installation only on "non inflammable" surfaces.

Indicates that the device's protection against electric shock is based on a low voltage input (50V max). Never use ground connections.

Indicates that the device has double insulation. Never use ground connections.

Indicates that the entire device is fully insulated and is equipped with a ground conductor.

Indicates the minimum distance to be kept between light source and illuminated surface or objects for installation

Other symbol

mm/in Indicates the cut-out diameter for device installation

WEEE Directive

The symbol shown in picture indicates that this product, at the end of its life, must not be handled as a domestic waste. It must be disposed of in a separate collection center, returned back to our company, or to your distributor, since these wastes contain potentially dangerous substances. The user is responsible for proper disposal of the product at the end of its life in the appropriate listed manner.

Serie: Prodotti » LUCI LED » Profili LED

LUCI LED
Profili LED

SYRIA 15

Scheda Disegni 2D

Materiale:
Alluminio

- Cromato
- Anodizzato opaco

Certificazioni
IP40

Sistema	12 V	24 V
Sorgente	LED	
Colore della luce	bianco freddo bianco caldo	
Voltaggio	10 - 15 Vdc	20 - 30 Vdc
Potenza consumo	1,5 W	
Consumo Ampère	0,12 A	0,06 A
Protezione LED	Picchi di voltaggio ± 500 V	
Polarità	SI
